Professional Summary

Software Engineer and AI/Data Science graduate with hands-on experience building computer vision, NLP, and scalable backend applications. Proven track record in customizing enterprise backend logic (Odoo/Python), optimizing REST APIs, and building end-to-end AI software from hackathons to production environments.

Professional Experience

Software Engineer *Metadesign Software Services Pvt Ltd. (Pune, India) — 2026 – Present*

- Engineered modular enterprise backend logic using Python and Odoo framework, streamlining workflows and business layers.
- Optimized backend database states using strict transaction principles to ensure consistency across asynchronous processes.
- Developed and refactored secure REST APIs to integrate technical architecture cleanly with production environments.

Education

B.Tech in Artificial Intelligence and Data Science *2022 – 2026*
MES College of Engineering, Kuttippuram (KTU) *CGPA: 8.22 – First Class With Distinction*

Technical Skills

Languages & Frameworks: Python, Java, C, HTML/CSS, Flask, Streamlit, React, Flutter, Odoo
AI, ML & Vision: OpenCV, MediaPipe, Scikit-learn, YOLO, Groq LLM Inference, Face Recognition, NLP
Databases & Tools: PostgreSQL, SQLite, Firebase, REST APIs, Git, GitHub, Roboflow, Kaggle, VS Code

Key Projects

GUIDO – AI-Powered Career Guidance Software *Main Project*

- Built an AI voice assistant for career counseling featuring posture analysis via MediaPipe and LLM PDF resume matching.

AI-Based IELTS Training Application *Full-Stack AI App*

- Implemented an automated evaluation and feedback platform for Reading, Listening, and Writing using Groq LLM inference.

Automated Attendance System *Mini Project — Published Paper*

- Designed an AI system using OpenCV and YOLO for face, ID card, and uniform detection with automated Telegram alerts.

Smart Traffic Monitoring System *Hackathon Project*

- Developed a Flutter mobile app featuring live map visualization for reporting traffic incidents and emergency routes.

FaceSnap – Event Photo Retrieval *Computer Vision*

- Built an event photo retrieval system leveraging face verification and unique hash-based photo clustering.

Achievements & Publications

- **Publication:** S. Ashraf *et al.*, *"Automated Attendance System"*, Int. Conf. on Smart Technologies (ICST), ISBN: 978-93-343-0309-4.
- **Hackathons:** Secured **2nd Prize** at MATRIX 30-Hour Hackathon (MESCE) & **3rd Prize** at KOTEC H Tech Fest.
- **Workshops Led:** Conducted departmental peer workshops on AI Vibe Coding and Building Scalable Software Products.

Certifications & Details

Certifications: IBM Python for Data Science, AI & Dev (Coursera) — NPTEL Python for Data Science — IBM Hadoop/Hive
Languages & Mobility: English, Malayalam — Open to Relocation (Yes) — Visa Available
